EDUCATION

University of California, San Diego — La Jolla, CA Expected Graduation: June 2028
B.S. in Data Science
Relevant Coursework: Data Structures & Algorithms, Principles of Data Science, Calculus I, II & III (incl. Multivariable), Linear Algebra, Research Methods

PROJECTS

Chipotle (NYSE: CMG) Discounted Cash Flow Valuation Model Excel, Financial Modeling
github.com/sabhargava-boop/cmg-dcf-valuation

- Built a 5-year unlevered DCF in Excel using FY2025 results and Q3 2026 filings; forecasted revenue, EBIT, D&A, and capex and applied a 9.0% WACC and 3.0% terminal growth rate to derive a $22.6B enterprise value and $18.68 implied share price.
- Performed WACC (8%–10%) and terminal-growth (2%–4%) sensitivity analysis, producing a $14.54–$26.92 implied share-price range; benchmarked against a market-implied 18.7x EV/EBITDA multiple.
- Evaluated key valuation drivers, including unit growth, restaurant margins, commodity-cost pressure, tariffs, and operating-lease treatment.

RevenueLens: Restaurant Financial Diagnostics & Forecasting Model Python, pandas, Excel
github.com/sabhargava-boop/restaurant-sales-analysis2

- Built a Python pipeline and Excel financial model from 161 days of POS data (~5,700 orders across 7 monthly exports), with adjustable cost, margin, and scenario inputs to forecast revenue and profitability.
- Performed driver and variance analysis on an approximately 10% decline in weekly sales, separating traffic and average-check impacts: orders fell 11% while average check remained flat.
- Segmented sales by day of week, isolating declines to Monday–Thursday and Sunday (up to 27% on Tuesdays), and recommended a four-week weeknight promotion test.

WORK EXPERIENCE

Financial Operations & Analytics Associate — Butter Chicken Indian Kitchen, Gig Harbor, WA 2025–Present

- Analyzed ~5,700 POS orders to identify revenue trends and presented findings and recommendations to ownership.
- Reconcile register and cash totals; track daily sales, expenses, inventory, and operating costs against budget and report variances.

Real Estate Finance Intern — B Bhargava LLC (family-owned), Puyallup, WA June–August 2026

- Analyzed a four-property real estate portfolio, reviewing property-level financials, asset characteristics, rental economics, and market valuation benchmarks.
- Built Excel cash flow models tracking monthly property expenses and rental yields; analyzed net operating income (NOI), capitalization rates, ROI, and cash-on-cash returns.
- Evaluated 12+ prospective property acquisitions and researched 40+ comparable property sales and local lease benchmarks across Pierce County.
- Reviewed property tax assessments, rent rolls, and vendor invoices to support financial due diligence, portfolio analysis, and record accuracy.

Membership Program Designer & Developer — Karma Indian Cuisine, Puyallup, WA June–August 2025

- Designed a four-benefit rewards structure and independently built the member sign-up flow and rewards website using Passcreator.

Outreach Coordinator — Karma Indian Cuisine & Fiesta Taqueria, Puyallup, WA 2023–2025

- Managed a delivery program serving 80+ schools across three school districts, coordinating schedules and menu selections with administrators.
- Led partner outreach and volunteer coordination to execute deliveries across locations on schedule.
